

Join us for the SolidWorks Innovation Day Virtual Event!

Through this online venue, you can attend the conference for one day, every week, until the end of June. Every 3rd week, the focus of the conference will change, and new presentations will be added to the auditorium! The previous presentations will then be available on-demand in the meeting room, giving you even more time to view this exciting content!

So, remember to come back now and then to check out the latest presentations!

- March 23 - April 12 Technology
- April 13 - May 3 Customer
- May 4 – May 24 Green Design
- May 25 – June 30 Vertical Industry

March 23 – April 12, 11:00 AM – 4:00 PM CET/EDT

Presentation Topic and Timing (CET/EDT)	Speaker	Presentation Abstract
11:00 AM – 12:00 PM CET/EDT Exhibit Hall Open		Visit all the partner booths in our Virtual Exhibit Hall!
12:00 – 12:30 PM CET/EDT Design for Sustainability	Jeff Ray Chief Executive Officer Dassault Systèmes SolidWorks Corp.	Sustainable design is a comprehensive, holistic approach to creating products and systems that are environmentally caring, socially just, and economically viable. Jeff will talk about the importance of sustainable design, highlight green product innovations, discuss its relevance to design engineers, and share implementation tips. He will unveil a new tool that can help you succeed in today’s design environment, by enabling sustainable design processes at all stages of a product’s lifecycle.
12:30 – 12:50 PM CET/EDT The Future of CAD Technology	Jon Hirschtick Co-Founder and Group Executive Dassault Systèmes SolidWorks Corp.	Jon is a highly respected visionary in the CAD industry. He is constantly looking at new and different technologies to discover ideas and help SolidWorks build better CAD tools for its customers. Jon will share his perspective on four exciting technology trends and make predictions on what will drive the future of CAD technology.
Technology Focus		
12:50 – 1:10 PM CET/EDT SolidWorks R&D Focus	Austin O’ Malley Chief Technology Officer Dassault Systèmes SolidWorks Corp.	Join us for an R&D perspective on SolidWorks. The SolidWorks R&D team is committed to its customers and is always striving to gather input from the user community to incorporate into the latest software release. You will gain insights into the SolidWorks product development process, find out about the major release drivers, and understand how these drivers influence SolidWorks 2010.

Presentation Topic and Timing (CET/EDT)	Speaker	Presentation Abstract
1:10 – 1:30 PM CET/EDT SolidWorks Technology Differentiation	Darren Henry Director, Product Marketing Dassault Systèmes SolidWorks Corp.	You will get an overview of the innovations and unique advantages that SolidWorks users enjoy every day. Darren will share some of the key differentiators that make SolidWorks the best CAD tool in the industry. Come and be wowed by the cool features in SolidWorks and join the fast growing CAD community with over one million users!
1:30 – 1:50 PM CET/EDT SolidWorks Education	Marie Planchard Director, World Education Market Dassault Systèmes SolidWorks Corp.	Marie will review what SolidWorks is doing for education. Approaching three-quarter of a million licenses in educational institutions all over the world, SolidWorks is here to help you find the professionals and future professionals you will need to be successful with your designs.
Breakout Presentations		
1:50 – 2:20 PM CET/EDT SolidWorks 2010 Product Overview	Dassault Systèmes SolidWorks Corp.	You will get a quick overview of the SolidWorks 2010 product line and find out how you can benefit from the trusted reliability and depth of functionality of SolidWorks to improve your work experience.
2:20 – 2:30 PM CET/EDT When Strong is Not Good Enough	Stephen Endersby Product Manager - Simulation Product Dassault Systèmes SolidWorks Corp.	Discover how a simulation-based approach can help you design better products in a shorter time while reducing the overall cost of development and end products.
2:30 – 2:40 PM CET/EDT SolidWorks EPDM: Keeping your Data Secure	Justin Burton Territory Technical Manager Dassault Systèmes SolidWorks Corp.	Where? What? How? Find out how you can benefit from having product data management (PDM) software. Discover how you can and be more efficient and effective with SolidWorks Enterprise PDM 2010 software.
2:40 – 2:45 PM CET/EDT Differentiate Your Product through Documentation	Dassault Systèmes SolidWorks Corp.	Whatever product we purchase, from consumer to heavy machinery, will always come with Product Documentation. However, the Product Documentation is often not as good as the product itself. This is just because we don't have the right tool. Learn more about how to make documentation faster, cheaper and better quality!
Every Tuesday Afternoon 2:45 to 3:15 PM CET/EDT Chat Room: Auditorium	LIVE CHAT SESSION Everything you Want to Know about Simulation. Technical Expert Dassault Systèmes SolidWorks Corp.	Participate in our live chat session! Our SolidWorks Experts will be there to answer all your questions, live from the Virtual Event Auditorium.
3:15 – 4:00 PM	Exhibit Hall	Visit all the partner booths in our Virtual Exhibit Hall!
