SolidWorks® Enterprise PDM Integration for SAP®

J2xPLM[®] INTEGRATION PLATFORM

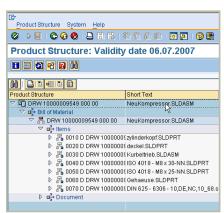

xPLM Solution's J2xPLM Integration Platform, an SAP certified solution, provides the leading SolidWorks Enterprise PDM integration with flexible deployment options to support your engineering best practices! xPLM's expertise in CAD and PLM integrations provides SolidWorks and SAP customers with a robust, flexible, and configurable integration.

xPLM provides an effective and intuitive integration between SolidWorks Enterprise PDM and SAP

SolidWorks parts, Bills of Materials and related documents can be uploaded easily to SAP ERP.

Uploaded items, such as material masters, BOMs and associated (linked) documents, are created automatically within your SAP ERP system.

A good integration between product lifecycle management (PLM) systems and CAx applications is a prerequisite to support effective and efficient engineering processes and drive increased innovation. This has never been more important and needed than now, as distributed and global design and engineering teams must collaborate across enterprises and supply chains. Access to the right design data and related manufacturing and supply chain data must be readily, yet securely, accessible in context. Designers and engineers can no longer work separately and apart from the rest of the enterprise.

xPLM Solution has leveraged their 20 years' experience in building effective CAD, Product Lifecycle Management (PLM), Digital Mock Up (DMU), MS-Office and ERP integrations to offer a next generation of service-oriented CAx and PDM integrations, based on the J2xPLM Integration Platform, for SolidWorks Enterprise PDM and SAP ERP.

SolidWorks Enterprise PDM Integration for SAP

The SolidWorks Enterprise PDM integration for SAP, developed by xPLM Solution, offers SolidWorks users an effective and intuitive integration with their SAP ERP system. Data and structures of both SolidWorks Enterprise PDM and SAP ERP are integrated providing the ability for bi-directional exchange of documents, CAD files, BOMs, parts (material masters), classification, item status and more. SolidWorks Enterprise PDM users do not need to access SAP ERP interfaces, but can perform all integration activities using the SolidWorks Enterprise PDM menus and forms, thus increasing user adoption and satisfaction. Robust customization capabilities are provided outside the SAP environment yielding lower support and maintenance costs.

SolidWorks Enterprise PDM Integration Features

User Interface Integration in SolidWorks Enterprise PDM

Toolbar, System Menu, Context Menu, Forms (e.g. File Card)

Workflow Integration (Trigged by any PDMWE event)

• Status Transition, Checkin/out, and Other Customer Defined Events

Integration Functionality - Documents Update

- Bidirectional Exchange of Metadata and Classification
- Document Structures
- Document Status Network (Release Levels)
- File Checkin/out (including Conversion to Neutral File Format)
- Integration of MS-Office and PDF documents

Integration Functionality – BOM/ Material/Items Update

- Bidirectional Exchange of Metadata and Classification
- Support for PDMWE/SolidWorks Configurations
- · Linking to Documents
- Production and Order BOM Support

Customization Capabilities

- COM Automation Support (VBA Script)
- XML Engine

J2xPLM Integration Platform Features

Deep Integration with SAP PLM Objects and Object Structures:

SAP Document and File
 Management, Material Master and
 BOM, Classification, Change and
 Release Management, and SAP User
 Interface Integration

Additional Benefits:

- Dialogs and features can be enhanced and configured specifically for users
- J2xPLM Integration Platform can access multiple PLM and SAP sites in parallel
- Batch processor enables file conversions and bulk transfer operations
- Script-Based Process Definition Language

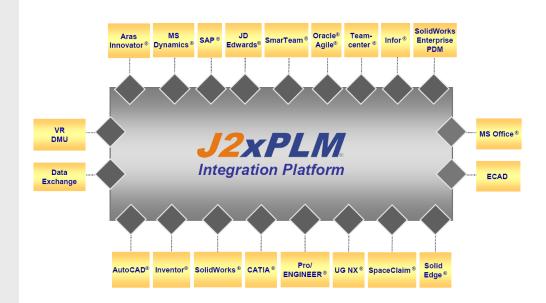

System Requirements

J2xPLM: V 1.0 or later
SAP: SAP 4.x or later
Enterprise PDM: 2009 or later
SolidWorks: 2007 or later

xPLM Solution is a SolidWorks Solution and a Certified Service Partner, providing highly qualified implementation experts with focused CAD/PLM skills and experience to ensure success. This is the highest level of accreditation a service partner can achieve in cooperation with SolidWorks.

xPLM Solution's J2xPLM Integration Platform provides highly qualified CAD and PDM connectors. The J2xPLM Integration Platform supports integration with MS-Office, PDM/PLM, CAD, ERP, VR/DMU, ECAD and Data Exchange applications.

The J2xPLM Integration Platform V1 is ready for SAP NetWeaver. This gives you the option to take advantage of the latest service-oriented technologies and business platform offered by SAP.

xPLM Solution is an official SAP Software Partner providing superior CAD and PLM integration solutions for SAP systems.

About xPLM Solution

xPLM Solution with headquarters in Dresden develops integration solutions between industry leading CAD, PLM and ERP systems and provides deployment and support services to the PLM industry. xPLM Solution brings with them more than 300 years of accumulated professional experience in the PLM market. For more than 20 years, the team has been at the forefront of developing and deploying robust, flexible, configurable and cost-efficient CAD and PLM integrations. The J2xPLM Integration Platform takes advantage of the latest service-oriented technologies.
