JETCAM EXPERT CADCAM/NESTING

Award-winning software driving virtually every CNC punch/profiling machine available

Since 1986 JETCAM Expert has led the way in nesting and automation. With support for virtually all machine brands and sheet/roll cutting technologies JETCAM Expert provides as much interaction or automation at ever stage of the CAD file to NC code process, producing clean, accurate and highly optimised nests and delivering savings in machine runtime, programming time and material utilisation.

Interactive or automatic, and scalable for all business types

JETCAM Expert is available in four core versions, and also has a number of additional modules available, depending on your needs. Expert Lite provides a low cost entry system. Expert 1 builds on this, with automation such as S.C.A.P. Expert Premium supports unlimited postprocessors, complex machines and modules such as Parametric Programming and High Performance Nesting. Expert Premium Connected Automation (CA) takes this one step further by offering tight integration to existing systems such as MRP that can then remotely control the full nesting process

Features					Expert Versions			
				Lite	1	Premium	CA	
DXF Viewer						•	•	
Automatic hazard avoidance (holes and forms)							•	
Interactive CAD with export facility CAD drawing import for popular CAD and machine tool vendor formats			DV5.0.1	•	•	•		
Component revision control, providing safety when generating static or dynamic nests			DXF Only	•	•	•		
		en generating static or dyi	namic nests	•	•	•	•	
Automatic tool selectio				•	•	•	•	
			rts nested at specific angles	•	•	•	•	
	ays, bump nesting (free h			•		•	•	
Automatic nesting of a	single component at 0 an	d 90 degrees		•	•	•	•	
User definable machine	macro commands			•		•	•	
Automatic tool path an	d tool rotation optimisation	on with highly efficient sec	quencing of final cuts	•	•	•	•	
Automatic repositioning	g and continuation of a cu	it over a reposition where	required	•		•	•	
Automatic parting and	unloading of components	at any angle		•		•		
Automatic turret/maga	zine loading and Automat	tic Turret Nesting		•		•	•	
Multiple tool libraries				•		•	•	
Automatic placement o	f special tools, with new	'exit direction' feature to a	void collisions	•		•	•	
Full simulation capabilities with runtime estimation data available for costing				•	•	•	•	
Automatic sheet processing, including skeleton destruction, common line punching/cutting				•		•	•	
Bevelling support				•	•	•	•	
Heat avoidance						•	•	
JET-Cut fully automatic	Fly Cutting							
Single Component Automatic Processing (S.C.A.P.)								
CAD Filtering (auto-repairing of 'dirty' CAD files)								
	ty to 'learn' preferred too	ling methods						
		iiiig iiietiious						
Remnant Material Management Support for combination machines					_		_	
• •		A 12 24 25				-	•	
		c.) or machines with option n' from external systems (nal extras (tapping units etc)			•	•	
Free Form Automatic nesting module option with read only materials and orders database				•	N/A	N/A	N/A	
Parametric programming - Interactive						•	•	
Parametric programming - Automatic batch processing						•	•	
Automatic Punch Press/Right Angle Shear combination support						•	•	
Complex Loader/Unloader support (i.e. Finn-Power, Sheetmaster, Trumalift, Tecnology Italiana, Rainer, Pullmax e				ullmax etc.)		•	•	
Interface to external data or MRP production control systems/built in material stock and order handling						•	•	
Automatic rectangular ı	nesting of dissimilar comp	oonents (RAN), with high p	erformance nesting included	(HP-RAN)		•	•	
Automatic free form ne	sting of dissimilar compo	nents (FFAN), or high perfo	ormance nesting module optic	on (FFHPN)		•	•	
Remote Control Processing (RCP) for full 'black-box' hands-off automation						•	•	
Routing modules inc. 2D & 3D (double-sided) and automatic screw/rivet insertion/removal				•		•	•	
						•		
Cutting machine modul	e, for handling all aspects	of composite and other n	naterial type cutting
