Unique Strength of SmartDO

- **Fire-and-Forget Optimizer Technology. Easy to use and learn SmartLink GUI. No need to work on parametric sensitivity study.**
- **Tcl/Tk based programmable platform. Innovative SmartPET and PET utilities allows the users to embed Tcl/Tk scripts into any text file by means of preprocessing the text file.**
- **Sophisticate mathematics and smart algorithms. Applicable to different disciplines and applications**
- **Strongly CAE-based and industrial-oriented. Comes with our superior consulting and customization services.**
