

WOODWORKING DESIGN

Design faster your woodworking projects

Panel management

- Decor or grain direction
- Edgebanding
- Laminate
- thickness
- curved stock

Connectors

Connectors allow to assembly panels and pieces of wood with traditional (tenon-mortise) or mechanical (dowels, cams, lamellos) types of joints. Create your insertion rules and apply them by drag-and-drop.

SWOODBox

Use your library of reusable assemblies to fill your projects including hardware and machining of adjacent parts.

SWOODBox is a unique feature to drag and drop

- Shelves
- Partitions
- drawers
- doors

Layout

Insert your cabinet and link its dimensions to a layout sketch.

Profiling

Profile your pieces of wood by a simple drag and drop.

- Shapes library
- Shapes replacement
- Apply on multiple edge

Reporting

Customizable documents (csv,html,edrawing,pdf,xml,excel,...)

- Export to cutting optimisation software
- Cut list
- Hardware list
- Labels

Miscellaneous

- SOLIDWORKS assemblies copy tool.
- Parametric panel library.
- EPDM integration.
