

More than 50 SOLIDWORKS tools to optimise your daily tasks

myCADtools enables you to adapt SOLIDWORKS to your work methods, automate recurring design tasks and improve your efficiency thanks to new business functions

## TO WHOM IS myCADtools FOR ?

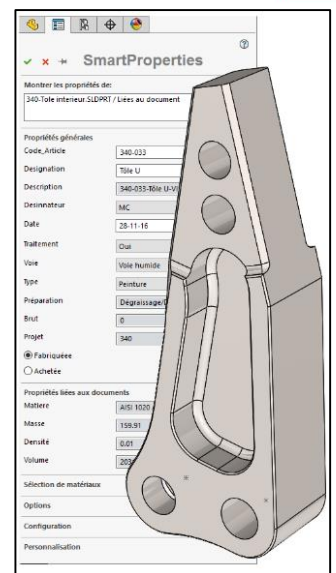

For all CAD designers from research unit who want to be more productive and efficient in their daily use of SOLIDWORKS

## YOUR ISSUES

- Adapt the CAD tool to your organization and work methods
- Reduce time wasted due to CAD data management in favour of design and innovation
- Enrich the basic CAD capabilities by taking into account your specific business requirements

## OUR SOLUTION

- Package of more than 50 productivity tools fully integrated with SOLIDWORKS
- Continuous updates based on enhancements and new SW versions
- Qualification and prioritization of developments according to customer requests

SmartProperties tool

## BENEFITS

### SAVE TIME AND GAIN RELIABILITY

- Standardise your SOLIDWORKS data to suit your organization and working methods
- Avoid errors and omissions by automating repetitive tasks
- Design faster and more efficiently with the many business features

### INCREASE PRODUCTIVITY AND BOOST INNOVATION

- Eliminate repetitive and tedious tasks with low added value
- Simplify and optimise your daily work with new exclusive features
- Accelerate and optimise the transition from design to production

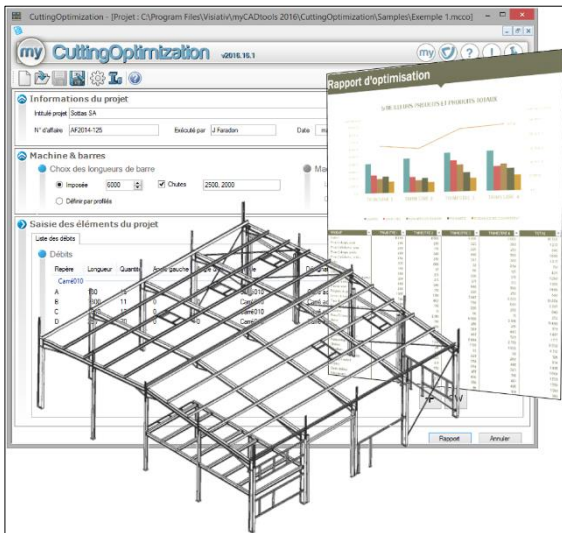

### ADD VALUE TO YOUR BUSINESS FUNCTIONS

- Benefit from tools developed from the experience feedback of more than 3000 corporate clients
- Each company is different and we adapt SOLIDWORKS to your specificities
- myCADtools is developed by SOLIDWORKS experts at your disposal

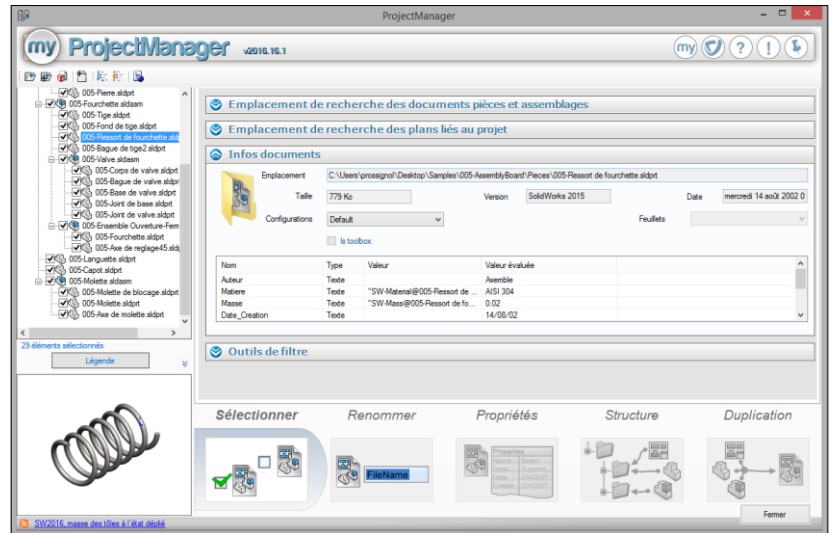

## MAIN FEATURES

Some tools from myCADtools

- **Project management**  
SmartProperties : Coding rules and quick creation of smart properties on documents  
BatchConverter, BatchProperties, Integration, SmartDrawings, PowerPrint : Mass processing tools for projects/folders
- **Design and Drawing**  
ColorChart : Applying colors from RAL and Pantone  
AssemblyBoard : Automatic creation of parts lists in the form of component sheets

CuttingOptimization tool

ProjectManager tool

- **Production**  
SmartBom : Extraction of multiple BOMs from projects/folders  
CuttingOptimization : Optimizing shaped output to minimise material falls  
CloneComponents : Automatically insert your configured library components
- **Administration**  
WhereUsed : Component configuration job search  
Dependencies : Redefine a new disk location in the references of your documents
