SolidProfessor Enterprise is an easy to manage, web-based SolidWorks education resource for companies who are looking for a method to continually improve their team’s skills and track progress, so managers and team members can achieve the goals of their organization.

Administrative capabilities include the ability to track user progress as they view lessons, create custom learning paths, disseminate lesson plans through designated groups of users, and test users as they progress through their learning path.

Smart interface design makes SolidProfessor Enterprise easy for administrators to setup and for designers to navigate.

Search On-Demand access to SolidWorks instructional videos means users have a reliable and accurate method for finding quick answers to design questions, saving valuable time and money.

Create Custom Learning Paths and disseminate the lesson plans through designated groups of users, allowing effective management of training based on the unique needs of the organization.

Track the progress of users automatically as they complete lessons.

Download Reports that allow managers to measure their team’s improvement in critical areas of SolidWorks.

Upload Documents, Standards, and Training Files to Enterprise.
Engineering Challenge

Many companies using SolidWorks today are continually challenged with keeping up to speed with the many SolidWorks capabilities, as well as ongoing updates and annual product improvements. Not operating at a high level of proficiency can lead to:

- Poor quality designs
- Prolonged design times
- Missed project deadlines
- Problems with design editability down the road
- Non-standard design practices
- And other problems...

SolidProfessor Enterprise provides a solution by allowing company administrators to provide a comprehensive SolidWorks education resource to individual users, while tracking usage and retention.

IT System Requirements

SolidProfessor Enterprise is entirely web-based, eliminating the need for complicated IT configurations. All that’s needed is:

- Broadband Internet Connection
- Flash Player 10
- Operating System with Web Browser
- Pointing Device & Speakers

SolidProfessor Enterprise

SolidProfessor Enterprise covers the full spectrum of SolidWorks skill levels, complementing both your SolidWorks software package and your team’s learning goals. Our selection of topics will meet your needs today, and be a valuable knowledge resource you’ll come back to again and again!

Library of Content

Versions 2007 - 2011

Basic Modeling Concepts:
Intro to 3D, AutoCAD to SolidWorks, Parametric Modeling, Basic Sketching, Parts, Assemblies & Drawings, Simulation.

Advanced Modeling Concepts:

Using Professional Add-Ins:
Workgroup PDM, PhotoWorks, PhotoView 360, Advanced Surfacing, DriveWorks Xpress.

CSWP / CSWA Prep Courses:
Videos to help prepare for the Certified SolidWorks Professional and Associate Examinations.

Using Premium Add-Ins:
Simulation, Routing, TolAnalyst, DimXpert.

Number of Lessons: 818+
Total Hours of Content: 37+

Subscription:
SolidProfessor Enterprise is a 12 month annual license. While on subscription you and your team will have access to:

- Automatic Updates
- New Course Releases
- Access to over 150 additional videos from the Ask SolidProfessor archives
- Update Training
