Reduce number of needed
clicks (process time)

Minimize errors

Improve efficiency and
reduce costs

BATCH PRINT

Prints shop drawings of assemblies/parts with only a few clicks.

BARCODE

Add barcodes to all parts within an assembly.

FLAT PATTERNS

Generates flat patterns from sheet metal parts as DXF/DWG files.

CUSTOM PROPS

Assigns custom properties to all assemblies/parts.

RENAME

Rename all parts and sub-assemblies under custom defined naming rules.

AUTO QTY

Add quantity information of parts and sub-assemblies as a custom property calculated from a given assembly.

MULTIBODY

Break multibody parts into multiple derived parts and automatically fill in custom properties and cut-list custom properties.
